SUMMARY

Motivated Computer Science Engineering graduate specializing in AI & ML with knowledge of Python, SQL, REST APIs, Flask, and Django. Passionate about developing scalable backend applications and eager to contribute as a Backend Developer while continuously learning new technologies..

SKILLS

Programming Languages: Python, JavaScript, SQL, TypeScript

Frontend: HTML5, CSS3, React.js, Bootstrap

Backend: Node.js, Express.js, Rest API, Flask, Django

Databases: MySQL, SQLite, PostgreSQL

Tools: Git, GitHub, VS Code, Postman, Firebase

Libraries: Pandas, Numpy, Requests

Concepts: Data Structures, OOPS, Computer Networks, DBMS, Basic HTTP, REST API

PROJECTS

Facial Access for Banking Transactions

- Developed a facial recognition-based authentication system for secure banking transactions
- Implemented CNN (Deep Learning) model to verify user identity
- Built backend using Django and integrated ML model
- Improved security by reducing unauthorized access

Employee Management System (Mini Project)

- Built a CRUD-based employee management system using Java
- Connected application to MySQL database using JDBC
- Implemented backend logic using Servlets
- Enabled efficient employee data management

EDUCATION

B.Tech in CSE(AI & ML)

Sri Venkateswara College of Engineering and Technology — Sep 2021 - May 2025

- 8.58 GPA

Board of Intermediate education (MPC)

Sri Vivekananda Junior Kalasala — Jun 2019 - May 2021

- 894

SSC

Vaagdevi High School — May 2019

- 9.7 GPA

CERTIFICATIONS

- SQL certificate: provided by EXCELR
- Python certificate: provided by EXCELR
